2. Click on the title of the article you would like to view, and a new window will open with the article requested.
3. Close the article to return to the main index.

Cover art: Cover is original transparent watercolor painting, “Caladiums,” by Florida artist Effie M. Lewis, Pembroke Pines. Visit her website at: www.effielewisart.com
Proceedings of the Florida State Horticultural Society 2007

Table of Contents

Published Papers

KROME MEMORIAL INSTITUTE (TROPICALS)

Performance of Five Cooking Banana Accessions at the National Germplasm Repository under Limestone Soil Conditions ........................................... 1
Tomás Ayala-Silva*, Raymond Schnell, Alan W. Meeroow, and Garry Gordon

Ornamental Plant Germplasm Exploration in Tropical Forests of Puerto Rico ........................................................................................................... 4
Tomás Ayala-Silva*, Alan W. Meeroow, Ricardo Goenaga, and Brian Irish

Quality Characteristics of Selected Muscadine Grape Cultivars Grown in North Florida ....................................................................................... 8
Jacque W. Brennan*, Amy Simonne, Robert C. Hochmuth, Linda Landrum, Meredith Taylor, Kimberly Evans, Cortisanna Peary, and Don Goode

The Potential of New Mangifera Species in Florida ........................................ 11
Richard J. Campbell

The Inverted Root Graft: Applications for the Home Garden in Florida ..................................................................................................................... 13
Noris Ledesma and Richard J. Campbell*

Kastooree (Mangifera casturi) as a Graft Interstock for Wild Mangos ......................................................................................................................... 15
Richard J. Campbell

Pruning Systems for Tropical Fruits in Florida ................................................. 17
Carlos F. Balerdi* and Jonathan Crane

Effect of Foliar Applications of Ascorbic Acid plus Ferrous Sulfate on Leaf Greenness of ‘Arkin’ Carambola (Averrhoa Carambola L.) Trees ............................................................................................................................... 20
Jonathan H. Crane*, Bruce Schaffer, Yuncong C. Li, Edward A. Evans, and Wanda Montas

Effect of Low Temperature Storage on Maneye Sapote (Pouteria sapota) Fruit Quality ............................................................................................... 24
Jonathan H. Crane* and Steve A. Sargent

Development of Mapping Populations for Avocado ................................................................................................................................. 26
Cecile Olano*, James Borrone, David Kuhn, J. Steven Brown, Helen Violi, Randy Ploetz, and Raymond Schnell

Phylogenetic Analysis of Aestivales (Planchon) American Native Grapes by Nuclear Microsatellite Profiling ......................................................... 30
Tresia Walters*, Suren Samuelian, Violeta Colova, and Stephen Leong

The Potential of Florida Lychee to Cross Over to American Consumers: An Industry Perspective ................................................................. 33
A.R. Rafie*, Carlos Balderi, and Jonathan Crane

Internet-based Audio and Video (IAV): A New Resource for Extension, Teaching, and Research ................................................................. 36
Ian Maguire

CITRUS SECTION

In-situ Measurement of the Detachment Force of Individual Oranges Harvested by a Canopy Shaker Harvesting Machine ........................................ 38
G. Bora, R. Elsani*, M. Hebel, and K. Lee

Daily Fluctuation in Fruit Detachment Force of ‘Valencia’ Orange Is Related to Time of Day, Temperature, Relative Humidity, Fruit Weight, and Juice Percentage ......................................................... 41
Luis Pozo, Anish Malladi, Karthik-Joseph John-Karuppuiah, Yolanda Lluch, Fernando Alferez, and Jacqueline K. Burns*

Reconciling Grower and Processor Objectives When Deciding to Harvest Juice Oranges ......................................................................................... 45
Jacob Searcy, Fritz Roka*, and Thomas Spreen

Optimum Nitrogen Rate for Fertigated Young Navel Orange Trees in Arizona .................................................................................................... 51
Ayuko Kusakabe*, Scott A. White, James L. Walworth, Glenn C. Wright, and Thomas L. Thompson

Georeferenced Ground Photography of Citrus Orchards to Estimate Yield and Plant Stress for Variable Rate Technology ........................................ 56
Arnold W. Schumann*, Kevin Hostler, Juan Carlos Melgar, and James Syvertsen

Effect of Winter- and Springtime Applications of Foliar Urea, NPK, or K-phosphate Sprays on Productivity of Citrus in Central Florida .................................................................................................................. 64
L. Gene Albrigo*

Citrus Water Requirements: Linking Irrigation Scheduling and Fertilizer Strategies ................................................................................................. 67
Kelly I. Morgan*, Thomas A. Obreza, and Edward A. Hamb

Effect of Water Management and Soil Application of Nitrogen Fertilizers, Petroleum Oils, and Lime on Incubation Productivity by Mycosphaerella citri, the Cause of Citrus Greasy Spot ........................................ 74
Sachindra N. Mondal, Kelly T. Morgan, and L.W. (Pete) Timmer

The Relative Salt Tolerance of ‘Rangpur’ Seedlings and ‘Arbequina’ Olive Cuttings ................................................................................................. 79
Juan Carlos Melgar*, James P. Syvertsen, Vicente Martinez, and Francisco García-Sánchez

Shade Effects on Salinity Tolerance of ‘Valencia’ Orange Trees on Rootstocks with Contrasting Salt Tolerance ..................................................... 85
James P. Syvertsen*, Francisco García-Sánchez, Vicente Martinez, and Juan Carlos Melgar

‘Hamlin’ Orange Trees on Flying Dragon Trifoliolate Orange, Changsha Mandarin, or Kothen Sweet Orange x Rubidoux Trifoliolate Orange Citrange Rootstock at Three In-row Spacings in a Flatwoods Site ........................................................................................................... 92
William S. Castle*, James C. Baldwin, and Ronald P. Muraro
Screening Citrus Rootstock Genotypes for Tolerance to the Phytophthora–Diaporthe Complex under Field Conditions .......... 97
James H. Graham*, Kim D. Bowman, Diane B. Bright, and Robert C. Adair, Jr.

Continued Development of Rootstocks Tolerant of the Phytophthora–
Diaporthe Complex via Greenhouse Screening ..................... 103

Integrated Approaches for Managing the Asian Citrus Psyllid
Diaphorina citri (Homoptera: Psyllidae) in Florida .................. 110
Jawwad A. Qureshi and Philip A. Stansly

Effectiveness of Several Soil-applied Systemic Insecticides
for Managing the Asian Citrus Psyllid, Diaphorina citri
Kuwayama (Homoptera: Psyllidae) .................................... 116
Michael E. Rogers and Dalia B. Shawer

Defoliation of Citrus Trees by Diquat .................................. 120

Citrus Leafminer Control and Copper Sprays for Management
of Citrus Canker on Lemon in Tucumán, Argentina ............. 121
Beatriz Stein*, Jacqueline Ramallo, Lucas Voguet, and James H. Graham

The Projected Impact of Citrus Greening in Sao Paulo
and Florida on Processed Orange Production and Price ........ 132
Thomas H. Spreen*, Mark G. Brown, and Ronald P. Muraro

Culturing Fastidious Prokaryotes—Points to Consider
when Working with Citrus Huanglongbing or Greening .......... 136
Michael J. Davis and Ron Bransky*

Characterization of Recently Introduced HLB and
CTV Isolates ...................................................................... 138
Mark Hilf, Stephen Garnsey, Cecile Robertson,
Siddarama Gowda, Tatinneni Satyanarayana, Mike Irey,
Peggy Sieburth, and William Dawson*

VEGETABLE SECTION

Influence of Soilless Media, Growing Containers, and Plug
Transplants on Vegetative Growth and Fruit Yield of
‘Sweet Charlie’ Strawberry Grown under Protected Culture ...... 142
Daniel J. Cantliffe*, Ashwin V. Paranjape, Peter J. Stoffella,
Elizabeth M. Lamb, and Charles A. Powell*

Growing and Marketing Cabbage at Local Green Markets
in Southeast Florida .......................................................... 151
Kenneth D. Shuler, Pei-Ann N. Shuler, Stephen J. Nie, and
Deanna V. Shuler

Performance of Strawberry Cultivars in Florida .................... 155
Bielinski M. Santos*, Craig K. Chandler, Stephen M. Olson,
and Teresa W. Olczyk

Yield and Quality of Greenhouse-grown Strawberries as Affected
by Nitrogen Level in Coco Coir and Pine Bark Media ............. 157
Daniel J. Cantliffe*, Javier Z. Castellanos, and
Ashwin V. Paranjape

Fruit Yield, Quality Variables, and Powdery Mildew Susceptibility
of Galia Melon Cultivars Grown in a Passively Ventilated
Greenhouse ...................................................................... 162
Jeanmarie M. Mitchell*, Daniel J. Cantliffe, Steven A. Sargent,
Lawrence E. Danoff, and Peter J. Stoffella

Plectosporium Blight of Cucurbits ........................................ 168

Comparative Effectiveness of New Insecticides in Controlling
Armyworms (Lepidoptera: Noctuidae) and Leafminers (Diptera:
Agromyzidae) on Tomato .................................................. 170
Dakshina R. Seal*, David J. Schuster, and Waldemar Klassen

Nutrient Management for Greenhouse Production
of Container-grown Organic Herbs ..................................... 178
Teresa Olczyk*, Y. Qian, K.W. Migliaccio, Y.C. Li, G.J. Hochmuth,
R.C. Hochmuth, E.H. Simonne, D.O. Freadwell, L.S. Osborne,
and R.K. Sprekel

New Technologies for Extension Education in Organic
Production ........................................................................ 181
Danielle D. Treadwell*

Effect of Nitrogen Rate on Yield of Tomato Grown with Seepage
Irrigation and Reclaimed Water ... ................................. 184
Monica Ozores-Hampton*, Eric Simonne, Phyllis Gilreath,
Steven Sargent, Daniel C. McClure, Thomas Wikes,
Eugene McAvoy, Phil Stansly, Sanjay Shukla, Pam Roberts,
Fritz Roka, Tom Obreza, Kent Cushman, and Darrin Parminter

Effects of Sulfur Fertilization on Tomato Production ............ 189
Bielinski M. Santos*, Camille E. Esnel, Jack E. Rechcltj, and
Humberto Moratinos

Power Analysis of On-farm Fertilizer Trials with Tomato ......... 191
Eric Simonne*, Monica Ozores-Hampton, Ramon Littell,
Kent Cushman, Fritz Roka, Phil Stansly, Sanjay Shukla,
Pam Roberts, Kelly Morgan, Thomas Obreza, Gene McAvoy,
Phyllis Gilreath, and Darrin Parminter

Effects of Early Pruning on ‘Florida-47’ and ‘Sungard’ Tomatoes197
Bielinski M. Santos*, Elizabeth A. Golden, Silvia Slamova, and
Anna Jakabova

Variability in Watermelon Flower Attractiveness to Insect
Pollinators .......................................................................... 199
Joshua H. Freeman* and Stephen M. Olson

Growing and Marketing Kohlrabi at Local Green Markets
in Southeast Florida .......................................................... 204
Kenneth D. Shuler*, Pei-Ann N. Shuler, Stephen J. Nie, and
Deanna V. Shuler

Determining Optimum Planting Dates for Intercropped Cucumber,
Squash, and Muskmelon with Strawberry ......................... 210
Bielinski M. Santos*, Elizabeth A. Golden, Silvia Slamova, and
Alicia J. Whidden

Pumpkin as an Alternative Crop in a Northeast Florida
Seepage-irrigated Production System ................................... 212
Christine M. Worthington*, Doug M. Gergela, and
Chad M. Hutchinson

HANDLING AND PROCESSING SECTION

BASF Freshseal® CIC Helps Keep Packed Tomatoes Firmer
and Fresher Longer ............................................................ 217
Mark P. Kohout*, Mark A. Ritenour, and James J. Satvatore

Effect of Edible Coatings and Other Surface Treatments
on Pericarp Color of Thai Lychee Cultivars ....................... 222
Nithiya Rattanapanone, Anne Plotto, and Elizabeth Baldwin*

A New Composite Coating Containing HPMC, Beeswax,
and Shellac for ‘Valencia’ Oranges and ‘Marisol’ Tangerines .... 228
Maria-Llanos Navarro-Terazaga, Maria-Bernadita Pérez-Gago,
Kevin Goodner, and Anne Plotto*

Relationship between Weight Loss and Visual Quality of Fruits
and Vegetables ................................................................. 235
Cecilia N. Nunes and Jean-Pierre Emond

Changes in the Postharvest Quality of Datil Hot Peppers
as Affected by Storage Temperature .................................. 246
Elena E. Lon Kan*, Steven A. Sargent#, Amy Simonne,
Nicole L. Shaw, and Daniel J. Cantliffe

A High Sensitivity Continuous Ethylene Monitoring Device
for Postharvest Applications .............................................. 251
Reza Shekariz*
Harvesting Carambola at Different Ripeness Stages Affects Postharvest Quality .......................................................... 256
Oren Warren*, Steven A. Sargent, Marcio E. Pereira, and 
Adrian D. Berry

Ripening of ‘Tainung’ Papaya Fruit Delayed by 1-Methylcyclopene
Marcio Eduardo Canto Pereira, Djalma Barbosa Dos Santos, 
Alme Simoes Da Rocha Bispo, and Silvia Barbosa Dos Santos

Temperature Tracking Using RFID in the Pineapple Supply Chain .............................................................. 262
C. Amador*, Jean-Pierre Emond, Cecilia Nunes, and 
Khe V. Chau

Visualization of Polyphenol Oxidase and Phenolics Distribution in Mesocarp of Fresh-cut Mango (cv. Kent) during Storage ...... 263
Sharon Dee, Jeffrey K. Brecht*, and 
Cecilia do Nascimento Nunes

Distribution of Aroma Volatiles in a Population of Tangerine Hybrids
Pauline Kerbiriou, Anne Plotto*, Kevin Goodner, 
Elizabeth Baldwin, and Fred G. Gmitter, Jr.

Testing Efficiencies of Postharvest Decay Controls .................. 276
J.A. Narciso

Microbiological Evaluation of Mechanically Harvested Citrus Fruit ................................................................. 277
Renee Goodrich-Schneider*, Michelle Danyluk, Reza Ehsani, 
and Loretta M. Friedrich

Effectiveness of Different Fungicides Applied Preharvest at Reducing Postharvest Decay of Fresh Florida Citrus ...................... 281
James J. Salvatore and Mark A. Ritenour*

Update on the USDA, ARS Citrus Scion Improvement Project.... 285
T. Gregory McCollum*

Flavonoids in Grapefruit and Commercial Grapefruit Juices: Concentration, Distribution, and Potential Health Benefits .......... 288
Jiuxu Zhang

Spectral Characteristics of Grapefruit Peel Oil Furanocoumarins and Coumarins ......................................................... 295
Thais Cesar and John A. Manthey*

A Preliminary Investigation of Furanocoumarin Metabolism by Aspergillus niger
Kyung Myung*, John A. Manthey, and Jan A. Narciso

Rheological Investigation of Pectin Deesterified using Salt-independent Pectin Methylesterase from Citrus................................. 304
Gary A. Lucio* and Randall G. Cameron

Economic Analysis of Ethanol Production from Citrus Peel Waste .......................................................... 310
Weiyou Zhou*, Wilbur Widmer, and Karel Grohmann

ORNAMENTAL, GARDEN, & LANDSCAPE SECTION

The Effect of Quality of Parks on Neighboring Property Values... 316
Alfredo B. Lorenzo*, Christopher Rubottom, Rueben Gomez, 
and Felicia Cosby

Tree Damage and Restoration following Hurricanes Katrina and Wilma at Miami Metroroozoo .......................................... 320
Henrique Mayer*, Tom Trump, and Francisco Escobedo

Fort Lauderdale Trial Garden—Year 5 (2006–07) .................... 323
Kimberly Moore* and Luci Fisher
